

# mongo-project

August 7, 2025

## 1 PRACTICAL QUESTIONS OF MONGO\_DB ASSIGNMENT

```
[1]: pip install pymongo
```

Defaulting to user installation because normal site-packages is not writeable  
Requirement already satisfied: pymongo in  
c:\users\hp\appdata\roaming\python\python313\site-packages (4.13.2)  
Requirement already satisfied: dnspython<3.0.0,>=1.16.0 in  
c:\users\hp\appdata\roaming\python\python313\site-packages (from pymongo)  
(2.7.0)  
Note: you may need to restart the kernel to use updated packages.

```
[1]: from pymongo import MongoClient
client = MongoClient('mongodb://localhost:27017/') # Update with your
        ↳connection string
db = client['superstore_db']
orders = db['orders']
```

1. Write a Python script to load the Superstore dataset from a CSV file into MongoDB.

```
[7]: import pandas as pd
from pymongo import MongoClient

# Connect to MongoDB
client = MongoClient('mongodb://localhost:27017/')
db = client['superstore_db']
orders = db['orders']

# Load CSV file
csv_file = "superstore.csv" # Update with your file path
try:
    data = pd.read_csv(csv_file, encoding='utf-8')
except UnicodeDecodeError:
    data = pd.read_csv(csv_file, encoding='latin1')
except Exception as e:
    print(f"An error occurred: {e}")

# Convert DataFrame to list of dictionaries
```

```
documents = data.to_dict('records')

# Insert documents into MongoDB
orders.insert_many(documents)
print("Data loaded successfully!")
```

Data loaded successfully!

2. Retrieve and print all documents from the Orders collection.

```
[8]: for doc in orders.find():
      print(doc)
```

```
